

Maxi Comfort Biomass Furnace

For Use with Chimney • Dual Auger

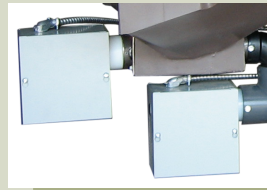

FEATURES and BENEFITS

- Now burn Corn, Wheat, Rye or Wood Pellets in one device, giving flexibility and choice of best cost fuel.
- 110,000 BTU output can heat up to 3,500 sq. ft.
- Removable Wood Pellet Insert for quick change to Grain Fuel.
- Thermostat Controlled or use the Maxi Comfort in manual mode for large open area heating such as workshops.
- High quality Heavy Gauge Steel provides excellent heat retention while ensuring quiet operation and extended life.
- Self Cleaning design means all you have to do is empty the ash pan every 2 weeks on average.
- Enlarged ducting connections reduce static pressure and allow easy connection to existing duct work.
- Front Mounted Heat Exchanger Cleaning Mechanism always keeps the heat exchanger clean and efficient.
- Design improvements now rate the Maxi Comfort Biomass Furnace at above 84% efficiency.

- Increased efficiency allows the Maxi Comfort Furnace to be eligible for government grants.
- Firepot retains heat and increases efficiency. Firepot has a 3 year warranty.
- Powered Vent eliminates the need for an expensive chimney.
- Battery back up insures venting of exhaust gases in the event of a power failure.
- 200 lb. Hopper Capacity for longer burn time. Equivalent to 4 bushels.
- Exclusive Dual Auger Design eliminates burn back smoke issues and provides a fuel break for safety.
- 5 Position Temperature Range Setting for smooth heat delivery and maximum comfort.
- Grain and Wood Pellets used in the Maxi Comfort are renewable Carbon Neutral Fuels.
- Biodegradable residual of Grain and Wood Pellet Ash are recommended as an excellent fertilizer.

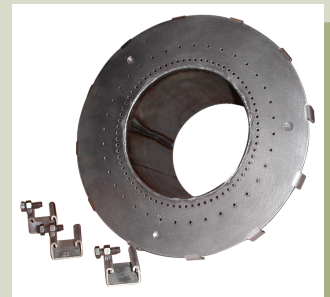

Included Accessories
