

Maxi Comfort Grain Furnace

Powered Vent • WMO Safety Switch • Battery Back Up

FEATURES and BENEFITS

- Now burn Corn, Wheat and Rye in one device, giving flexibility and choice of best cost fuel.
- 110,000 BTU output can heat up to 3,500 sq. ft.
- Thermostat Controlled or use the Maxi Comfort in manual mode for large open area heating such as workshops.
- High quality Heavy Gauge Steel provides excellent heat retention while ensuring quiet operation and extended life.
- Self Cleaning design means all you have to do is empty the ash pan every 2 weeks.
- Enlarged ducting connections reduce static pressure and allow easy connection to existing duct work.
- Front Mounted Heat Exchanger Cleaning Mechanism always keeps the heat exchanger clean and efficient.
- Design improvements now rate the Maxi Comfort Biomass Furnace at above 84% efficiency.

- Increased efficiency allows the Maxi Comfort Furnace to be eligible for government grants.
- Firepot is made of cast iron and retains heat therefore increasing efficiency. Firepot has a 3 year warranty.
- 200 lb. Hopper Capacity for longer burn time. Equivalent to 4 bushels.
- 5 Position Modulating Temperature Range Setting for smooth heat delivery and maximum comfort.
- The grains used in the Maxi Comfort are renewable, Carbon Neutral Fuels.
- Biodegradable residue of the grain ash is recommended as an excellent fertilizer.
